

List of Claims:

- 1. (Withdrawn) A front-loading sink/laundry combo, comprising:
- a cabinet;
- a front-loading automatic washing machine having a drum, which is suspended inside of the said cabinet;
- a motor connected to the said drum;

washing process control and programming means;

connection means for water supply and a waste line;

an access door;

a <u>sink with a faucet</u> mounted on the top of the cabinet and connected to the same water supply and a waste line;

vibration-absorbing wall anchoring means.

- 2. (Withdrawn) The front-loading sink/laundry combo defined in claim 1 wherein said washing machine is fitted for drying, another words it is washer/dryer combo.
- 3. (Withdrawn) The front-loading sink/laundry combo defined in claim 1 wherein said front-loading automatic washing machine is <u>removable</u> attached to the cabinet under the sink.
- 4. (Withdrawn) The front-loading sink/laundry combo defined in claim 1 wherein said front-loading automatic washing machine is <u>pivotally attached</u> to the cabinet under the sink.
- 5. (Withdrawn) The front-loading sink/laundry combo defined in claim 1 wherein said front-loading automatic washing machine is <u>pivotally attached</u> to the cabinet under the sink having two way motion control and position-securing device.
- 6. (Withdrawn) The front-loading sink/laundry combo defined in claim 2 wherein said front-loading automatic washing machine is <u>removable</u> attached to the cabinet under the sink.

- 7. (Withdrawn) The front-loading sink/laundry combo defined in claim 2 wherein said front-loading automatic washing machine is <u>pivotally attached</u> to the cabinet under the sink.
- 8. (Withdrawn) The front-loading sink/laundry combo defined in claim 2 wherein said front-loading automatic washing machine is <u>pivotally attached</u> to the cabinet under the sink having two way motion control and position-securing device (bar).
- 9. (Withdrawn) The front-loading sink/laundry combo defined in claim 1 wherein P-trap is mounted flush to the wall and configured on a way that the water accumulated in its lower expanded tank-like part is used for lowering vibration of the cabinet;
- 10. (Withdrawn) The front-loading sink/laundry combo defined in claim 2 wherein P-trap is mounted flush to the wall and configured on a way that the water accumulated in its lower expanded tank-like part is used for lowering vibration of the cabinet;
- 11. (Withdrawn) The front-loading sink/laundry combo defined in claim 2 wherein said dryer has a condensation device.
- 12. (Withdrawn) The front-loading sink/laundry combo defined in claim 2 wherein said dryer has a ventilation means, which are direct connected to the waste line by-assing P-trap.
- 13. (Withdrawn) The front-loading sink/laundry combo defined in claim 2 wherein said dryer has a <u>check valve</u>, which prevents sewer smell from entering laundry.
- 14. (Withdrawn) The front-loading sink/laundry combo defined in claim 2 wherein said dryer equipped with retractable ventilation hose.
- 15. (Withdrawn) The front-loading sink/laundry combo defined in claim 2 wherein said dryer equipped with water-filled lint trap and P-trap combo.
- 16. (Withdrawn) A front-loading sink/laundry combo, comprising: a cabinet;
- a front-loading automatic washing machine having a drum, which is suspended inside of the said cabinet, a motor connected to the said drum, washing process

control and programming means, connection means for water supply and a waste line;

an access door;

a <u>pitched sink with a faucet</u> mounted on the top of the cabinet and connected to the same water supply and a waste line and the <u>rotation axle of the drum is</u> <u>oriented</u> in accordance with that pitch;

vibration-absorbing wall anchoring means.

- 17. (Withdrawn) The front-loading sink/laundry combo defined in claim 16 wherein said washing machine is fitted for drying, another words it is washer/dryer combo.
- 18. (Withdrawn) The front-loading sink/laundry combo defined in claim 16 wherein said front-loading automatic washing machine is <u>removable</u> attached to the cabinet under the sink.
- 19. (Withdrawn) The front-loading sink/laundry combo defined in claim 16 wherein said front-loading automatic washing machine is <u>pivotally attached</u> to the cabinet under the sink.
- 20. (Withdrawn) The front-loading sink/laundry combo defined in claim 17 wherein said front-loading automatic washing machine is <u>removable</u> attached to the cabinet under the sink.
- 21. (Withdrawn) The front-loading sink/laundry combo defined in claim 17 wherein said front-loading automatic washing machine is <u>pivotally attached</u> to the cabinet under the sink.
- 22. (Withdrawn) The front-loading sink/laundry combo defined in claim 16 wherein P-trap is mounted flush to the wall and configured on a way that the water accumulated in its lower expanded tank-like part is used for lowering vibration of the cabinet;
- 23. (Withdrawn) The front-loading sink/laundry combo defined in claim 17 wherein P-trap is mounted flush to the wall and configured on a way that the water accumulated in its lower expanded tank-like part is used for lowering vibration of the cabinet;

- 24. (Withdrawn) The front-loading sink/laundry combo defined in claim 17 wherein said dryer has a condensation device.
- 25. (Withdrawn) The front-loading sink/laundry combo defined in claim 17 wherein said dryer has a ventilation means, which are direct connected to the waste line <a href="https://example.com/bypassing-en-loading-to-the-near-waste-line-bypassing-en-loading-to-the-near-waste-line-bypassing-en-loading-to-the-near-waste-line-bypassing-en-loading-to-the-near-waste-line-bypassing-en-loading-to-the-near-waste-line-bypassing-en-loading-to-the-near-waste-line-bypassing-en-loading-to-the-near-waste-line-bypassing-en-loading-to-the-near-waste-line-bypassing-en-loading-to-the-near-waste-line-bypassing-en-loading-to-the-near-waste-line-bypassing-en-loading-to-the-near-waste-line-bypassing-en-loading-to-the-near-waste-line-bypassing-en-load-wast
- 26. (Withdrawn) The front-loading sink/laundry combo defined in claim 17 wherein said dryer has a <u>check valve</u>, which prevents sewer smell from entering laundry.
- 27. (Withdrawn) The front-loading sink/laundry combo defined in claim 17 wherein said dryer equipped with retractable ventilation hose.
- 28. (Withdrawn) The front-loading sink/laundry combo defined in claim 17 wherein said dryer equipped with water-filled lint trap and P-trap combo.
- 29. (Withdrawn) The front-loading sink/laundry combo defined in claim 16 wherein said front-loading automatic washing machine is <u>pivotally attached</u> to the cabinet under the sink having two way motion control and position-securing device.
- 30. (Withdrawn) The front-loading sink/laundry combo defined in claim 17 wherein said front-loading automatic washing machine is <u>pivotally attached</u> to the cabinet under the sink having two way motion control and position-securing device.
- 31. (Withdrawn) Method for installation of dryer or washer/dryer combo machine in a room having standard provision for sink connection and no provision for ventilation comprising the following steps:

 a partial re-routing of a high humidity hot air from re-circulation circuit of the dryer;

removing said hot air out of operational area;

directing said hot air toward water waste line;

guiding of said hot air to the waste line via check-valve bypassing P-trap; releasing of said hot air to waste line ventilation pipes over the adjacent part of a waste line;

preventing waste line air from return back to washer/dryer combo by check-

valve;

accumulating waste water in re-configured P-trap for lowering vibration of the cabinet.

32. (New) A front-loading sink/laundry combo, comprising:

a cabinet;

a front-loading automatic washing machine having a drum, which is suspended inside of the said cabinet, a motor connected to the said drum, washing process control and programming means, connection means for water supply and a waste line;

a sink with a faucet mounted on the top of the cabinet and connected to the same water supply and a waste line;

a P-trap configured flash to the wall with a tank-like expansion attached to the lower part of a cabinet and used for accumulation of large amount of running waste water which works as unit's cabinet static and dynamic vibration absorber.

- 33. (New) A front-loading sink/laundry combo, comprising:
- a cabinet;
- a front-loading automatic washing machine having a drum, which is suspended inside of the said cabinet, a motor connected to the said drum, washing process control and programming means, connection means for water supply and a waste line;
- a sink with a faucet mounted on the top of the cabinet and connected to the same water supply and a waste line;
- a waste water and hot air from dryer are connected to the same drain line where waste water goes via P-trap and hot air goes direct to waste line bypassing P-trap utilizing air vent system of the waste line.
- 34. (New) A front-loading sink/laundry combo, comprising:

- a cabinet;
- a front-loading automatic washing machine having a drum, which is suspended inside of the said cabinet, a motor connected to the said drum, washing process control and programming means, connection means for water supply and a waste line;
- a sink with a faucet mounted on the top of the cabinet and connected to the same water supply and a waste line;
- a water-filled washable (self cleaning) lint trap, which is built-in in a tank-like expansion of the P-trap.
